**ON-LINE SALE FORMAT:** : Individual videos of the bulls and group videos are available for viewing on [www.frontierlivesale.com](http://www.frontierlivesale.com). We are giving people the option of viewing the bulls at Midland Bull Test and bidding online, the online sale will be a TIMED FORMAT, an online sale, without a live auctioneer. It is much like a regular sale, but much lower key. At 12 pm NOON on March 22nd bidding will open on all lots. On March 28th at 1:00 p.m., we will go through the lots in catalog order, Lot 1 will close at 1PM, Lot 2 will close at 1:03PM, Lot 3 will close at 1:06PM, and so on. If there are any active bids placed in the last minute of time, the bidding will extend 3 minutes. This will keep happening until there are no active bids placed in the last minute.

**There will be several options to bid:**

- You can be on your computer and bid as the lots close starting at 1 pm on March 28th. NOTE: if your internet connection is marginal, please call ahead of time of sale time so we can try to help or make arrangements for someone to be on the phone with you.
- You can call any of the representatives listed on page 3 and they will get the bids placed for you.
- You can come look at the bulls anytime ahead of the sale. You can then place a bid online, indicating the maximum you would pay for the bull. No person, including us, will know what that number is. When that lot comes up, if there is competitive bidding, the computer will bid for you up to that amount. For example, you want to bid on 3 lots but can't attend or be at a computer, or your internet service is marginal. You can place a MAX bid ahead of time on those 3 lots. No one knows what your MAX bid is. If your MAX bid is \$8500 and the starting price is \$6500, with no other bids, you will buy the bull at \$6500. If there are online or other bids, the system will bid on your behalf up to (but not more than) your MAX bid. Just know that nothing beats a MAX bid – your bid WILL be first!

This is a secure and convenient method to buy your bulls. Timed bidding is an easy way around a poor internet connection. Please consider coming to look at the bulls ahead of time, go home, register/log in and bid with confidence!

**This sale is not a standard format, there will be no auctioneer.**

This sale will be broadcast live over the internet via Frontier Live Sale. The sale will begin with the ability to place MAX bids now through March 28th. On March 28th at 1:00 p.m., we will go through the lots in catalog order, Lot 1 will close at 1PM, Lot 2 will close at 1:03PM, Lot 3 will close at 1:06PM, and so on. If there are any active bids placed in the last minute of time, the bidding will extend 3 minutes. This will keep happening until there are no active bids in the last minute.

To place bids, you must PRE-REGISTER, go to the Silhouette Angus Ranch Sale page at [www.frontierlivesale.com](http://www.frontierlivesale.com) and click "Register to Bid". You must have an account with Frontier Live sale, and you must then register for this auction. Registrations do not carry over from sale to sale.

For those who wish to simply view the sale without registering, login with your Facebook, or Google account. If you don't have a Facebook or Google account, a guest login will be provided.

Instructions for watching the sale can be found at [www.frontierlivesale.com](http://www.frontierlivesale.com)

We encourage you to register early to avoid any problems and make sure you are set up to view the sale. Visit [www.frontierlivesale.com](http://www.frontierlivesale.com) for all the details!

**Rena McKeever 406-461-0431**

Dear Cattlemen,

It is our pleasure to welcome you to our Private Treaty Online Timed Sale. This year we are offering 65 registered yearling Angus Bulls. The bulls were pulled off the cow in the middle of September and sent to Midland Bull Test for a feed only program. We have done this the past few years and have been pleased how the bulls have grown out. Midland Bull Test knows about bulls. All sale bulls have genomic-enhanced EPDs utilizing the Angus GS DNA test to provide accurate parentage and \$ values.

Sires of the AI bull calves include Basin Jameson, Cherry Crk Blue Collar G275, HPCA Vision, and BAR Dynamic. Our natural service bulls, many offspring from home raised bulls, that goes back to purchases from Leo McDonald and the bulls offered at Midland Bull test. Whether we are selecting bulls for AI'ing or ones to put out in the pasture, we look for docility, feet correctness, above average EPDs and maternal strength.

It was pretty dry around our neck of the woods this year, but we were fortunate enough to get a few timely rains that helped the calves and pastures. We were not able to cut any grass hay but had carryover from the past few years. As far as grain hay, it was pretty spotty throughout the county.

The online sale can be viewed on Frontier Livestock Sales. The bulls can be viewed on Frontier Livestock prior to the start of the online sale. We are going to run the sale for seven days. As always, feel free to stop by Midland Bull test and view the bulls. Stop at the office, let them know you are there or give one us at the ranch a jingle and we can let the Midland crew know that you are on your way.

Please contact any Silhouette Angus crew with any questions.

Thanks again for your interest in the bulls,  
Silhouette Angus

---

**SALE TIME** Opens March 22nd at noon and closes at noon on the 28th. Online sale will be broadcast on [www.Frontierlivesale.com](http://www.Frontierlivesale.com).

**LOCATION** - 1286 East Snow Creek Road • Jordan, Montana 59337

**SALE ORDER** - Animals sell in catalog order. Lot number is identified by the orange tag in the right ear.

**FERTILITY** - Performance records and final weights will be available before the sale starts. All bulls will be fertility tested before delivery and we will develop the bulls until delivery.

**SIGHT UNSEEN BUYING** - If you are unable to make the online sale, and would like us to handle your purchases, we would be glad to do that for you with complete honesty and satisfaction.

**TERMS & CONDITIONS** - All cattle sell under the terms and conditions of the

American Angus Association. The buyer retains full possession and salvage value of their purchased bulls. Papers will be transferred free of charge, if requested on sale day.

**GUARANTEE** - Any bull injured in the first breeding season will be given credit minus salvage value towards a replacement bull or future Silhouette Angus Bull. Injured bulls must be diagnosed by a vet or by one of us. No credit will be given for treatable injuries. Please contact us prior to being sold for salvage. All claims must be made by September 1, 2026.

**VIDEOS AND ONLINE BIDDING** - The sale will be on [www.Frontierlivesale.com](http://www.Frontierlivesale.com). The videos of the bulls can also be found on [www.Frontierlivesale.com](http://www.Frontierlivesale.com). Please register at least 24 hours prior to the sale in order to receive a bidder number. See details inside front cover

**DELIVERY & DISCOUNTS** - A buyer that takes his bull home receives \$50.00 off per bull. We also offer a volume discount: 2% for two bulls up to 5% for five bulls.

# AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

## PRODUCTION

**Calving Ease Direct (CED)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Dry Matter Intake (DMI)**, expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

**Yearling Height (YH)**, expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

## MANAGEMENT

**Claw Set (Claw)**, expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

**Foot Angle (Angle)**, expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

**Docility (DOC)**, expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

**Pulmonary Arterial Pressure EPD (PAP)**, expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

**Hair Shed EPD (HS)**, expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

## CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

**\$Value Indexes**, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

**Energy Value (\$EN)**, expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

**Feedlot Value (\$F)**, expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

**Grid Value (\$G)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

**Combined Value (\$C)**, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

## INTERPRETING EPDS (EXPECTED PROGENY DIFFERENCES)

This guide provides simple definitions and real-world numerical examples to help cattle producers better understand and apply EPDs in their operations.

### Birth Weight (BW) – in pounds

Predicts the difference in birth weight of a bull's calves compared to another bull.

Example: Bull A: BW = -1.0  
Bull B: BW = +2.0  
Difference = 3 lbs.

If Bull B's calves average 82 lbs at birth, Bull A's calves are expected to average 79 lbs.

Application: Lower BW EPDs are typically preferred when breeding heifers.

### Weaning Weight (WW) – in pounds

Measures pre-weaning growth performance.

Example: Bull A: WW = +60  
Bull B: WW = +45  
Difference = 15 lbs.

If calves average 550 lbs at weaning, Bull A's calves are expected to average 565 lbs.

### Yearling Weight (YW) – in pounds

Predicts post-weaning growth.

Example: Bull A: YW = +105  
Bull B: YW = +90  
Difference = 15 lbs.

### Docility (DOC)

Predicts temperament of offspring.

Example: Bull A: DOC = +25  
Bull B: DOC = +10

Higher DOC values indicate calmer, easier-to-handle cattle.

### Scrotal Circumference (SC) – in centimeters

Impacts fertility and earlier puberty in daughters.

Example: Bull A: SC = +1.5  
Bull B: SC = +0.5

Bull A's sons are expected to average 1 cm larger scrotal circumference.

### Yearling Height (YH) – in inches

Predicts frame size.

Example: Bull A: YH = +1.2  
Bull B: YH = +0.2

Bull A's calves are expected to be approximately 1 inch taller at yearling age.

### Dry Matter Intake (DMI) – lbs/day

Predicts feed consumption during post-weaning growth.

Example: Bull A: DMI = +1.0  
Bull B: DMI = -0.5  
Difference = 1.5 lbs/day.

Over 150 days: 225 lbs additional feed.

### Milk (MILK/MM/MK) – in pounds

Predicts daughters' milking ability reflected in calf weaning weight.

Example: Bull A: Milk = +25  
Bull B: Milk = +15  
Difference = 10 lbs at weaning due to maternal milk production.

### Direct Calving Ease (CED/CE) – percent

Predicts ease of calving in first-calf heifers.

Example: Bull A: CED = +12  
Bull B: CED = +6  
Difference = 6%.

If Bull B averages 10% assisted births, Bull A is expected to average 4%.

### Heifer Pregnancy (HP/HPG) – percent

Predicts probability daughters become pregnant as first-calf heifers.

Example: Bull A: HP = +8  
Bull B: HP = +2  
Difference = 6%

On 100 heifers, this could result in 6 additional bred females.

### Maternal Calving Ease (CEM/MCE) – percent

Predicts ease with which daughters calve as first-calf heifers.

Example: Bull A: CEM = +8  
Bull B: CEM = +3  
Difference = 5%

If Bull B daughters average 12% assisted births, Bull A daughters would average 7%.

EPDS - EPDs in this catalog are current as of March 6, 2026.

Visit Angus.org for updated EPDs
